IN THE SPECIFICATION

Please amend the paragraph on page 11, lines 20-25 as follows.

Anti-PAI-1 antibodies displaying the desired binding specificity, as described above, may be obtained using screening methods similar to those described by Declerck et al., (1988), Blood, v. 71, p. 220, and anti-multimeric vitronectin antibodies may be screened for desired binding specificity as described by Sockman Stockmann et al., (1993), J. Biol. Chem., v.268, p.22874 or Seiffert et al., (1994), J. Biol. Chem., v.269, p.2659.
